

RAHUL KUMAR

Meerut, India | +91 9508334011 | rk0281482@gmail.com | [linkedin.com/in/rahul-kumar-636268293](https://www.linkedin.com/in/rahul-kumar-636268293)

CAREER OBJECTIVE

ECE student with practical exposure to IoT, embedded systems, sensor interfacing, and renewable-energy projects, seeking a Technical Sales Internship to apply technical knowledge in solar, energy monitoring, IoT, and customer-focused technical solutions while developing strong field and business-development skills.

EDUCATION

Meerut Institute of Technology (AKTU Lucknow) — Meerut, India

B.Tech in Electronics and Communication Engineering | 2023 – 2027

• **CGPA:** 7.0/10

TECHNICAL SKILLS

Renewable Energy: Solar PV Fundamentals, Renewable Energy Systems, Energy Harvesting, Basic Energy Management

Energy Systems: Basic understanding of BESS, Batteries, Inverters, Electrical Panels and Energy Monitoring

IoT & Monitoring: ESP32, Sensors, IoT Systems, Remote Monitoring, MQTT, HTTP (Basic)

Embedded Systems: Microcontrollers, GPIO, ADC, Sensor Interfacing, Embedded

Programming **Programming:** C, Python

Tools: MATLAB, Proteus, Multisim, Circuit Design & Simulation

Professional Skills: Communication, Technical Presentation, Customer Interaction, Problem Solving, MS Office/Excel (Basic)

TRAINING & INTERNSHIP

Research and Development Intern (Hybrid) | May 2026 – July 2026 (*Sensor2AI Lab, Indian Institute of Technology Patna*)

- Worked on IoT-based wearable emergency alert systems using embedded systems and sensor interfacing.
- Gained practical experience in prototype development, IoT communication, sensor data acquisition, and real-time monitoring.

Embedded Systems Developer (Virtual) | 2025

Microchip Technology (AICTE)

- Developed foundational knowledge of microcontrollers, embedded programming, GPIO, and system-level embedded concepts.

VLSI Design & Semiconductor Engineering Intern | 2026 (*EduSkills*)

- Learned digital design fundamentals, semiconductor concepts, and hardware design methodologies.
-

PROJECTS

Footstep Electricity Generator — Renewable Energy Project

- Developed a renewable energy harvesting prototype that converts mechanical foot pressure into electrical energy using piezoelectric sensors.
- Explored energy generation, power harvesting, sensor interfacing, and practical renewable-energy applications.

Wearable IoT Emergency Alert Device — ESP32 & Telegram

- Developed an ESP32-based IoT device for real-time emergency notifications using sensors, Wi-Fi communication, and Telegram Bot.

Wearable IoT Safety Device — Voice-Based Safe-Word & Whisper AI

- Designed an AI-assisted wearable safety system using voice-based emergency trigger detection and Whisper Speech Recognition.

Automatic Public Space Robot

- Built a prototype robotic system for automated mobility and obstacle navigation using embedded control concepts.
-

AREAS OF INTEREST

Solar & Renewable Energy | BESS & Energy Storage | Energy Monitoring | IoT & Remote Monitoring | Embedded Systems | Technical Sales
